Documents Buyers Need Before Moving Forward

客户推进项目目前需要的资料

COA / Spec / SDS

Core technical files can be prepared according to product type and batch availability.

Testing references

Assay, HPLC/UV, microbiology, heavy metals, solvent residue, moisture and appearance references.

Packing references

Bottle, carton, label and product appearance references help buyers review the final presentation.

OEM/ODM files

Formula, label, packing and sample documents can be coordinated for finished-product projects.

Packaging, Storage & Export Support

Storage & handling

Warehouse and packing areas support product storage, batch organization and dispatch preparation.

Packing coordination

Bottle, jar, sachet, stick pack, carton and private-label packing details can be reviewed early.

Export support

Product selection, document preparation and shipment coordination are supported for global buyers.

A Clear Path From Inquiry to Sample

从询盘到样品的清晰流程

01 Understand needs

Product name, specification, dosage form, packing format and required documents.

02 Recommend options

Shortlist suitable products, variants and sample directions.

03 Prepare documents

COA, specification, images, packing references and batch information are checked.

04 Sample & packaging

Sample plan, packing style, label direction and carton needs are reviewed.

05 Order support

Confirmed orders move into production, packing, documentation and shipment coordination.
